

# TECHNICAL DATASHEET

## Battery water

36-1767, 36-1769

### Product description:

Battery water is a demineralised quality water. All impurities and minerals are eliminated.

Production method: Reverse Osmosis (RO)

### Applications:

Batteries, steam-irons, humidors, water based cooling systems.

### Technical information

Conductivity: 1-5  $\mu\text{S}/\text{cm}$

Density: 1

Colour: Transparent

Smell: None

Storage time: In unopened packing the time is unlimited.

Flammability: Not flammable

**Packing:** 1L, 4L
