

TECHNICAL DATASHEET

36-1772

Monteringspasta

Asennustahna

Description

36-1772 assembly paste is a water based heat curing jointing compound. It has been specifically designed to be used in the assembly of vehicle exhaust systems. Its asbestos free formulation will withstand the pressures and temperatures found in vehicle exhaust systems.

Method of use

Ensure that surfaces to be jointed are clean and free from loose rust, dirt and grease.

Abrade the surface with a medium emery paper.

Spread paste liberally to all joints in the system and assemble the joints immediately after application. Run the engine until warm and the exhaust paste will set to form a gas tight seal.

As a vehicle exhaust assembly compound that lubricates the joints to make assembly faster. When heated and cured, it provides a reliable carbon monoxide proof and vibration resistant seal.

Appearance

Smooth brown coloured paste.

Cleaning

Water or detergent solution.

Storage

Store in a dry, well ventilated area. Protect from extremes of temperature, ie frost and strong sun light. Minimum 12 months shelf life stored in original unopened container.
