SILIKONSPRAY

A friction-reducing and water-dismissive silicon that makes it easy to lubricate different types of materials.

With this silicon you can easily lubricate tight conveyors, handles, buttons, rubber parts, zippers, drawers etc. This product can also work as a mold release agent. For best result spray the part to be treated from a distance of 20-30 cm. Do not apply the product on hot surfaces and use it in a well-ventilated area.

Highlight ingredients

- Silicone
- Heptane

Claims:

- Easy to apply
- High friction reduction
- Temperature range -30 °C to +200 °C
- Manufactured accorded to ISO 14001
